&
National Agriculture Development Cooperative Ltd (NADCL)
Baramulla (UT of J & K)

(website: www.nadcl.org / email: info@nadcl.org / Contact No. 8899921702)

About the host Organizations:

Karnataka Veterinary, Animal and Fisheries Sciences University (KVAFSU), Bidar:

Veterinary, Animal and Fisheries Sciences education was under the Agricultural Universities for almost three decades. Realizing the need for an exclusive University in Karnataka, KVAFSU, Bidar was formed as per the Karnataka Act No. 9 of 2004 and was published in the Karnataka Gazette Extra-Ordinary on the 23rd day of February, 2004. The University was established exclusively for the development of education and learning; conduct of research and extension education and transfer the rural oriented technologies in the areas of Veterinary, Animal, Dairy and Fisheries Sciences in Karnataka. The logo of the University is inscribed with the slogan "**Farmers Friendly and Rural Oriented**", which emphasizes the importance given to the betterment of the farming community. The University is also involved in Extension Education of specialized knowledge and transfer of technologies to the farming community in cooperation with the Government Departments concerned.

In this context, KVAFSU, Bidar is strongly committed in absorbing newer paradigms and using them to develop excellent human resource, innovative technologies and their dissemination so as to serve the livestock and fishery farming community of the state and the country. The University has state wide jurisdiction with 05 Veterinary Colleges, 02 Dairy Science Colleges, 01 Fisheries Science College, 01 Institute of Veterinary Biologicals, 01 Wildlife Research Institute, 05 Animal Husbandry Polytechnics, 10 Livestock/Fisheries Research and Information Centres and 01 Krishi Vigyan Kendra.

National Agriculture Development Co-operative Ltd. (NADCL): NADCL was established under Self Reliant Co-operative Act, 1999: under Ministry of Cooperatives with a mission to promote, disseminate and mutual exchange of scientific information of Agricultural Science among the scientific diaspora and stakeholders. The NADCL was primarily established to serve as a bridge for communication between agriculture scientists, extension workers and farmers. Blending of the influences of these three, bring an effective result in the doubling of farmer's income. In this context NADCL already organized a number of awareness programs,

international conferences and national training courses; individually as well as in collaboration in State Agriculture Universities and with various institutes of ICAR.

Background:

Extension and advisory services are often multi-disciplinary in nature and can grow stronger through a sustained supply of vital elements (like changing concepts, approaches, tools and techniques). Further, the information generated through extension research can be an important input for planning, implementing extension interventions and policies in addition to its contribution to disciplines of science. There is a widespread concern that extension and advisory services should be "applied" in nature and hence, all theories and models should prove to be applicable, with implications on the sector(s) for which it was developed. Further, communication of research findings through quality publications, extension and advisory services is very essential to ensure identification of relevant problems that match with the context and contributes to the uptake of information generated ultimately benefitting the farming community.

In this context, this course is aimed to sensitize the faculty, scientists, field professionals and students involved in Extension education and Advisory services to revisit the strategies and concepts so as to bring about a paradigm shift in the extension delivery mechanisms for the farming community.

Objectives of the Course:

- Sensitize and update the faculty, field professionals, scientists, extension specialists, students and entrepreneurs about recent advances in extension education and advisory services for effective dissemination of the information/ technology .
- Identify and share the best practices in extension education and advisory services .
- Focus on identification of the constraints and challenges in extension education and advisory services and find suitable solutions and strategies for sustainable development of the farming community.
- Create a quality discussion forum of the professionals through interaction and dialogue between experts and participants based on diverse research and extension activities.

Resource Persons:

The experts from ICAR institutes, CG institutes, State Agriculture and Veterinary Universities and Senior Officers from the line Departments will cover various topics through lectures, audio – video presentations, and group discussions. The details of the lectures and their schedule will be given separately.

Participants & Eligibility:

This training is open for the scientists, teachers, research scholars, KVK faculty, field professionals, NGO staff, PG/Ph.D students and marketing personnel.

Important Dates:

Last date for receipt of application form:	01-07-2021
Intimation of selection:	03-07-2021
Confirmation about participation:	05-07-2021
Commencement of training:	08-07-2021

Venue:

The 21 Days National Refresher Course (NRC 2021) on "Extension Education and Advisory Services for Sustainable Development of Farming Community" will be organized through virtual lecture/class.
